
Engineering Secure Digital Transformation

Technology Advisory | Systems Integration | Managed Services

01 EXECUTIVE PERSPECTIVE

Technology Decisions Should Begin with Business Outcomes

Technology is no longer a support function. It shapes competitiveness, resilience, innovation, and sustainable growth. EL ABB Technology helps organizations connect business priorities with secure, scalable, and practical technology decisions.

Technology should solve business challenges, not create additional complexity.

02 ABOUT EL ABB TECHNOLOGY

Built to Bridge Business Strategy and Technology Execution

EL ABB Technology is a Doha-based technology advisory and consulting company established to help organizations navigate technology complexity with clarity, security, and purpose.

We help leadership teams align technology investments with business priorities and develop clear, resilient, and outcome-focused transformation roadmaps.

01

Why We Exist

Simplify technology complexity

02

How We Work

Advisory-led, business-first

03

What We Aim to Build

Long-term trusted partnerships

03 COMPANY PURPOSE

Why EL ABB Technology Was Established

01 THE CONTEXT

Organizations are under increasing pressure to modernize, adopt emerging technologies, protect critical information, and improve operational performance. Yet technology investments often become fragmented, overly complex, or disconnected from business priorities.

02 OUR PURPOSE

EL ABB Technology was established to bridge this gap. We help organizations understand where technology can create the greatest value, develop clear priorities, and move from strategy to secure and disciplined execution.

03 BUSINESS ECOSYSTEM CONTEXT

As part of a broader business ecosystem that includes EL ABB Holding, EL ABB Technology combines local market understanding, entrepreneurial agility, and a long-term commitment to technology-led growth.

OUR AMBITION

EL ABB Technology is committed to supporting Qatar's secure digital transformation and long-term technological development by helping organizations adopt resilient, effective, and future-ready technology solutions.

04 VISION, MISSION & PHILOSOPHY

Technology That Serves Business

VISION

To become one of Qatar's most trusted technology partners, enabling organizations to embrace secure, intelligent, and sustainable digital transformation.

MISSION

To help organizations improve operational performance, strengthen cybersecurity, accelerate innovation, and achieve measurable business outcomes through business-aligned technology solutions.

OUR PHILOSOPHY

Business should drive technology decisions.

Technology should empower people and simplify operations.

Security should be embedded by design, not added afterward.

Solutions should be scalable, practical, and aligned with long-term objectives.

Partnerships should continue beyond implementation.

Clarity before complexity.

Strategy before technology.

Partnership beyond delivery.

05 LEADERSHIP

Leadership Driving Strategy, Growth, and Technology Transformation

EL ABB Technology is guided by a leadership team focused on strategic growth, business-aligned technology, strong governance, and long-term value creation.

EXECUTIVE LEADERSHIP

Yousuf Bin Ebrahim Al-Mahmoud

Chairman & CEO

Yousuf Bin Ebrahim Al-Mahmoud is the Chairman & CEO of EL ABB Technology. He brings extensive executive and board-level experience across investment, real estate, agriculture, construction, technology, marine services, and diversified business sectors.

His leadership focuses on strategic growth, governance, long-term value creation, and building partnerships that support Qatar's evolving business and technology landscape.

MANAGEMENT LEADERSHIP

Ndeye M. Wade

Managing Director

Ndeye M. Wade is the Managing Director of EL ABB Technology, leading the company's strategic positioning, service development, corporate direction, and advisory-led market approach.

Her focus is on building EL ABB Technology as a credible, business-first technology consulting company.

06 HOW WE CREATE VALUE

Three Core Pillars Supporting the Technology Lifecycle

EL ABB Technology supports organizations across the full technology lifecycle, from strategic decision-making and solution implementation to ongoing operational support and optimization.

TECHNOLOGY ADVISORY

Assessment,
strategy, roadmaps,
governance, and
executive guidance.

SYSTEMS INTEGRATION

Architecture,
integration,
implementation,
migration, testing, and
deployment.

MANAGED SERVICES

Ongoing support and
monitoring

Service governance
and optimization

Continuous
improvement after
implementation

Together, these three pillars allow EL ABB Technology to support customers from initial strategic assessment through implementation and into long-term operational improvement. This integrated model helps ensure that technology decisions remain aligned with business priorities throughout the full engagement lifecycle.

Advise → Integrate → Operate → Optimize

07 TECHNOLOGY ADVISORY

Aligning Technology Investments with Business Strategy

EL ABB Technology helps organizations assess priorities, reduce technology complexity, and develop actionable roadmaps aligned with business goals.

BUSINESS VALUE FLOW

Our advisory approach helps leadership teams make informed technology decisions before committing resources to implementation.

08 BUSINESS VALUE FLOW

From Business Objectives to Measurable Outcomes

Technology creates lasting value when strategy, governance, and execution work together. EL ABB Technology connects business priorities with a structured path from assessment to implementation and continuous improvement.

PRIMARY VALUE FLOW

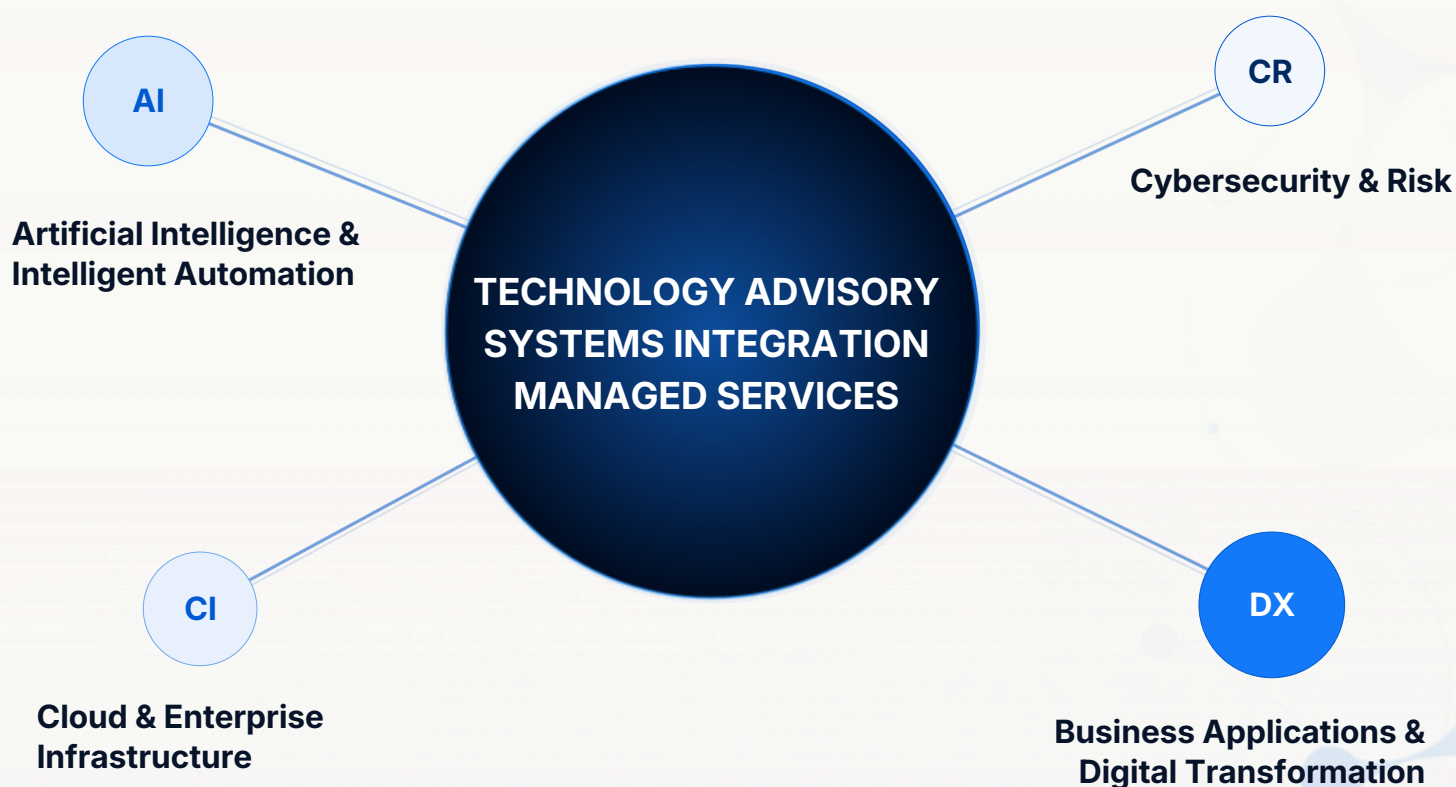

POTENTIAL OUTCOMES

- Improved operational efficiency
- Stronger security and resilience
- Better executive decision-making
- Reduced technology complexity
- Scalable business growth
- Improved employee and customer experiences

09 CORE TECHNOLOGY CAPABILITIES

Three Business Pillars Across Four Technology Domains

Technology Advisory, Systems Integration, and Managed Services apply across four connected technology domains, linking strategic direction, disciplined delivery, and ongoing operational support.

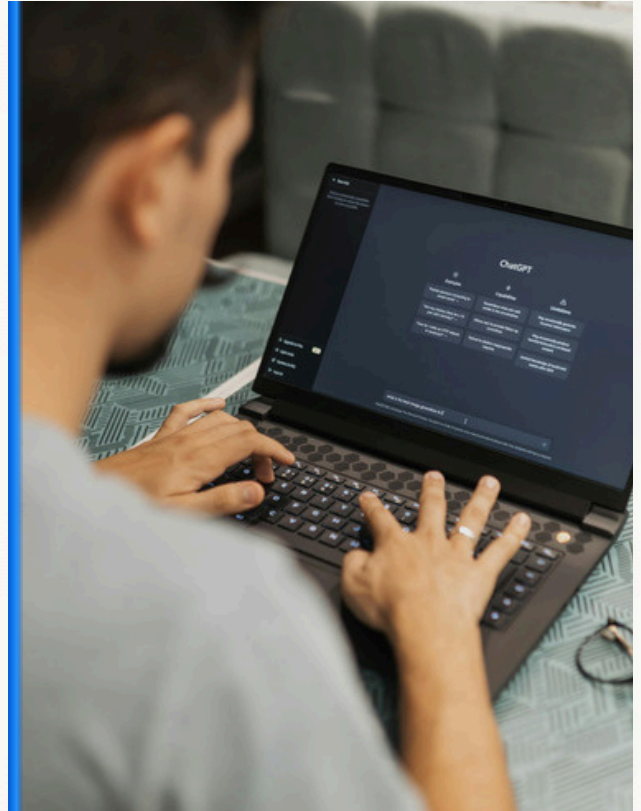

01	02	03	04	05
Strategic assessment	Solution Design	Implementation	Governance	Managed support & continuous optimization

10 ARTIFICIAL INTELLIGENCE

Turning Artificial Intelligence into Practical Business Performance

Artificial Intelligence can improve decision-making, automate repetitive work, and help organizations use knowledge more effectively. EL ABB Technology supports responsible AI adoption by identifying relevant use cases grounded in business priorities, data readiness, governance, and appropriate controls.

Our approach is business-led rather than technology-led.

CORE CAPABILITIES

- | | |
|---|--|
| 01
AI Strategy & Readiness Assessment | 02
Enterprise Generative AI |
| 03
Intelligent Workflow Automation | 04
Knowledge Management |
| 05
Retrieval-Augmented Generation | 06
Data & Analytics Enablement |
| 07
Responsible AI Governance | |

POTENTIAL BUSINESS OUTCOMES

- Faster access to organizational knowledge
- Reduced manual and repetitive work
- Improved productivity
- Better decision support
- More consistent customer and employee experiences
- **Responsible and controlled AI adoption**

Artificial Intelligence should enhance human decision-making and business performance, not be adopted simply because it is fashionable.

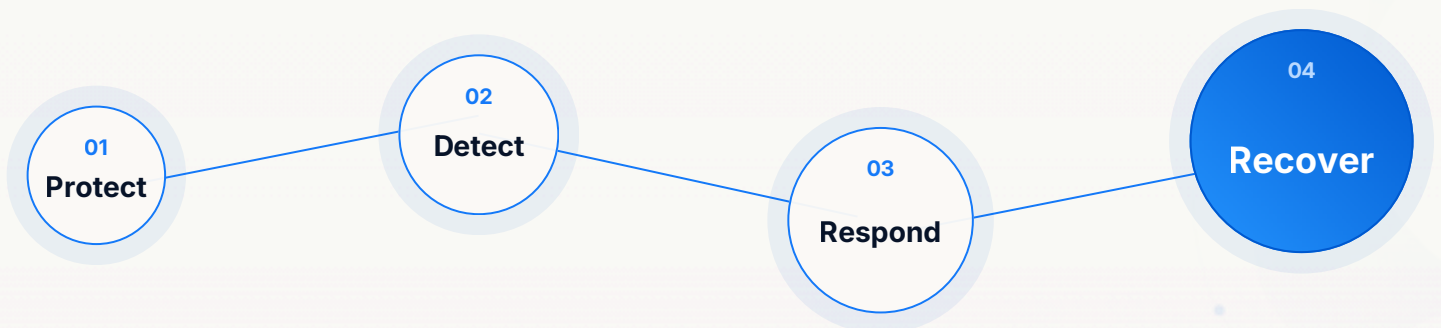

11 CYBERSECURITY & RISK

Protecting Business Through Security by Design

Cybersecurity is a business imperative. Protecting information, infrastructure, and operational continuity requires more than security products; it requires a proactive approach built around resilience, governance, and continuous improvement.

EL ABB Technology integrates security throughout the engagement lifecycle to help organizations operate with greater confidence.

SECURITY LIFECYCLE

CORE CAPABILITIES

- | | |
|--|---|
| <ul style="list-style-type: none"> Cybersecurity Assessments Security Architecture Identity & Access Management Vulnerability Management | <ul style="list-style-type: none"> Security Governance Business Continuity Planning Security Awareness |
|--|---|

POTENTIAL BUSINESS OUTCOMES

- Reduced security exposure
- Improved operational resilience
- Stronger governance and accountability
- Better protection of critical information
- Greater confidence in digital transformation initiatives

12 CLOUD & ENTERPRISE INFRASTRUCTURE

Building Connected, Growth-Ready Digital Foundations

Modern organizations require technology environments that are reliable, connected, and ready to evolve with business needs. EL ABB Technology helps organizations modernize infrastructure, strengthen connectivity, and develop cloud strategies shaped around operational requirements and future growth.

INFRASTRUCTURE VALUE FLOW

CORE CAPABILITIES

- | | |
|--------------------------------|--|
| Cloud Strategy & Readiness | Secure Remote Connectivity |
| Microsoft Azure & Hybrid Cloud | High Availability & Disaster Recovery |
| Infrastructure Modernization | Infrastructure Assessment & Optimization |
| Enterprise Networking | |

POTENTIAL BUSINESS OUTCOMES

- Improved reliability and availability
- Greater scalability
- Reduced infrastructure complexity
- Improved performance and connectivity
- Stronger business continuity

13 BUSINESS APPLICATIONS & DIGITAL TRANSFORMATION

Connecting Technology with Business Operations

Business applications create the greatest value when they simplify operations, connect information, and support faster decision-making. EL ABB Technology helps organizations assess, implement, integrate, and optimize platforms that support operational efficiency and future growth.

CORE SOLUTIONS

01

Customer Relationship Management

02

Enterprise Resource Planning

03

Workflow Automation

04

Business Intelligence & Reporting

05

Low-Code Business Applications

06

Data Integration

07

Process Optimization

08

Legacy Modernization

TRANSFORMATION FOCUS

01

Understand the current operating model

02

Identify process gaps and improvement priorities

03

Define a focused transformation roadmap

04

Implement connected business solutions

05

Support adoption and continuous improvement

Digital transformation begins with understanding the business before redesigning the technology.

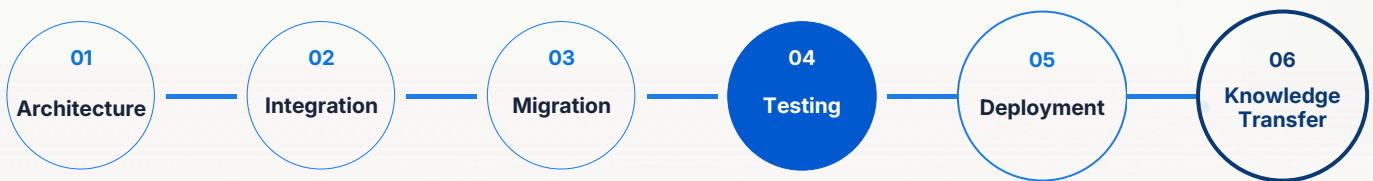

14 SYSTEMS INTEGRATION

Connecting Technologies into Reliable, Integrated Business Solutions

EL ABB Technology helps organizations bring together platforms, infrastructure, applications, data, and security controls into cohesive technology environments. Our systems integration approach combines solution architecture, disciplined implementation, governance, and knowledge transfer to reduce complexity and support successful adoption.

Architecture → Integration → Migration → Testing → Deployment → Knowledge Transfer

INTEGRATION VALUE FLOW

CORE CAPABILITIES

Solution Architecture

Technology Integration

Implementation & Configuration

Data & Platform Migration

Testing & Quality Assurance

Project Governance

Technical Documentation

Knowledge Transfer

15 MANAGED SERVICES

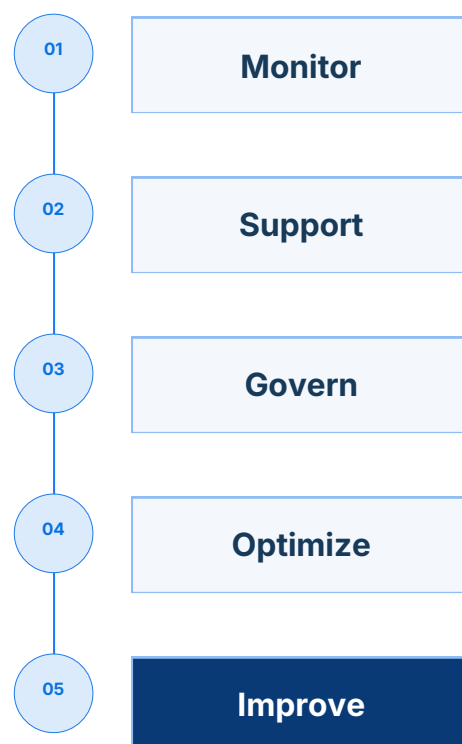

Continuous Support, Optimization, and Operational Confidence

Technology value does not end at implementation. EL ABB Technology provides structured managed services designed to support operational stability, security, performance, and continuous improvement across the technology lifecycle.

MANAGED SERVICE AREAS

- | | |
|--|---|
| 01
Infrastructure Monitoring and Support | 02
Cloud Operations |
| 03
Cybersecurity Monitoring and Coordination | 04
Application Support |
| 05
Service Desk and Incident Management | 06
Performance Optimization |
| 07
Preventive Maintenance | 08
Reporting and Service Governance |

CONTINUOUS SERVICE CYCLE

Ongoing service management helps maintain performance, strengthen operational continuity, and create value beyond implementation.

16 DELIVERY METHODOLOGY

A Structured Approach to Successful Technology Delivery

Technology projects create value when they are delivered through a disciplined, collaborative, and measurable process. EL ABB Technology follows a structured methodology designed to reduce implementation risk and maintain alignment with business objectives.

01

Assess

Understand business goals, current systems, risks, and priorities

02

Design

Develop an effective solution architecture shaped around business and operational requirements.

03

Implement

Deliver through structured project management and clear documentation

04

Support

Provide operational support, knowledge transfer, and monitoring

05

Optimize

Improve performance, resilience, and long-term business value.

Successful engagements begin with understanding and continue through ongoing improvement.

17 EL ABB APPROACH

Advisory That Goes Beyond Technology

Selecting a technology partner is about more than technical capability. Organizations need advisors who understand business priorities, reduce complexity, and remain committed beyond implementation.

WHAT DEFINES OUR APPROACH

01 Executive-Level Engagement

Direct collaboration with business and technology decision-makers

02 Business Outcomes First

Technology recommendations aligned with measurable operational objectives

03 Vendor-Neutral Thinking

Solutions evaluated according to customer needs and strategic fit

04 Security by Design

Cybersecurity integrated throughout the engagement lifecycle

05 Scalable Architecture

Solutions designed to support future growth and change

06 Long-Term Partnership

Advisory, support, and optimization beyond initial delivery

07 Knowledge Transfer

Clear documentation and effective enablement for customer teams.

Technology projects may end. Trusted advisory relationships should continue.

18 ENGAGEMENT MODELS

Flexible Engagement Models Aligned with Customer Needs

EL ABB Technology offers flexible engagement models designed to match each customer's priorities, level of maturity, and preferred path to transformation. Whether the need is strategic advisory, structured implementation, systems integration, or ongoing support, each engagement is shaped around clear objectives and meaningful business outcomes.

01 Advisory & Assessments

Focused evaluations of priorities, maturity, risks, and opportunities.

02 Strategy & Roadmaps

Structured plans connecting business objectives with technology investments.

03 Project Implementation

Disciplined delivery of approved solutions and transformation initiatives.

04 Systems Integration

Architecture, integration, migration, testing, and coordinated deployment.

05 Managed Services

Ongoing support, governance, monitoring, and optimization.

19 INDUSTRIES & USE CASES

Technology Solutions Designed Around Industry Priorities

Every industry operates within a different regulatory, operational, and competitive environment. EL ABB Technology adapts its advisory and technology approach to the business priorities of each organization.

PRIORITY SECTORS

- | Government & Public Sector
- | Financial Services
- | Construction & Real Estate
- | Energy & Industrial
- | Healthcare
- | Hospitality & Retail
- | Professional Services

COMMON USE CASES

- 01 Technology strategy and digital roadmaps
- 02 AI adoption and knowledge automation
- 03 Cybersecurity and risk assessments
- 04 Cloud and infrastructure modernization
- 05 CRM, ERP, and business application implementation
- 06 Workflow and process automation
- 07 Business intelligence and reporting

Our industry-focused approach helps organizations apply technology in ways that address sector-specific priorities, operational challenges, and long-term transformation goals.

20 STRATEGIC TECHNOLOGY PARTNERSHIPS

Building a Technology Ecosystem Around Customer Needs

EL ABB Technology is developing strategic relationships with global technology vendors, authorized distributors, and specialist solution providers to broaden its capabilities and support integrated technology delivery across key business needs.

01

Artificial Intelligence

AI platforms, intelligent automation, data-driven solutions, and emerging technologies.

02

Cybersecurity

Security technologies, identity, risk management, resilience, and protection capabilities.

03

Cloud & Infrastructure

Cloud platforms, enterprise infrastructure, networking, connectivity, and modernization.

04

Business Applications

Enterprise applications, CRM, ERP, workflow, integration, and digital transformation platforms.

05

Data & Analytics

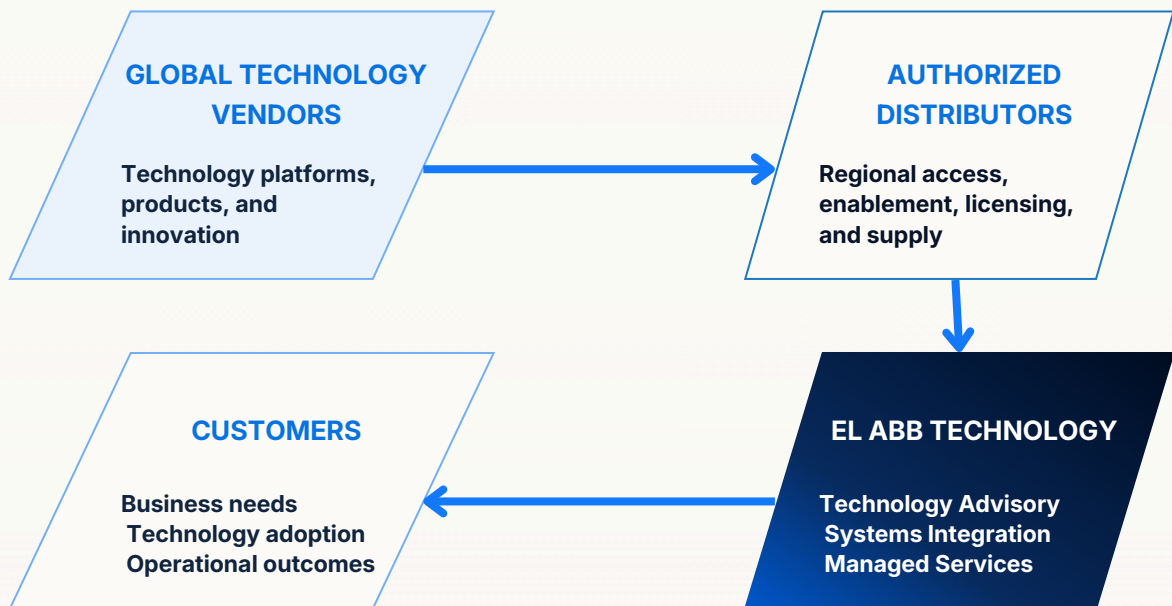

Data platforms, analytics, business intelligence, information management, and decision support.

21 TECHNOLOGY ECOSYSTEM & GROWTH DIRECTION

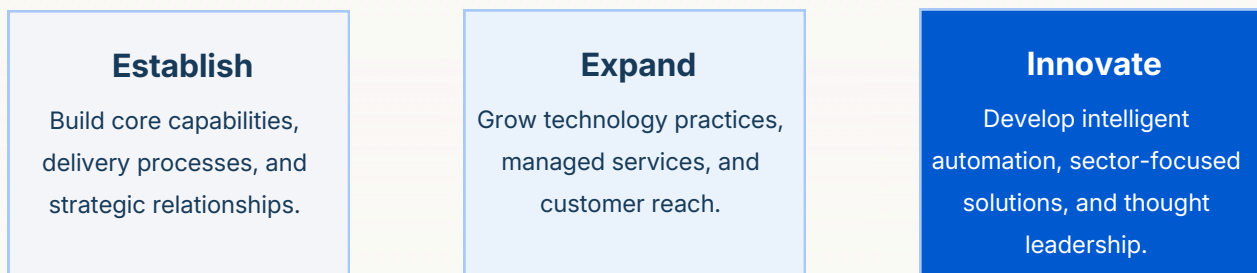

Connecting Global Technology with Customer Needs

Sustainable growth is built through capability development, strategic relationships, continuous learning, and disciplined execution.

CONCEPTUAL TECHNOLOGY ECOSYSTEM

ROADMAP

Innovation is a process of continuous capability development, not a single destination.

Let's Build a Technology Roadmap That Creates Real Business Value

Start with a focused conversation about your business priorities, technology challenges, and future objectives.

01

Schedule an Executive Consultation

02

Request a Technology Assessment
